

How You Are Helping

Kasiya supports the people of Guanacaste and Costa Rica, preserving their culture and natural environment. This commitment means we build without environmental impact; we employ local people wherever possible; we buy local produce and materials to support our immediate communities and tradesmen; and we re-invest a percentage of any profit we make back into local conservation projects as well as businesses and villages to help them become self-sufficient in their own right.

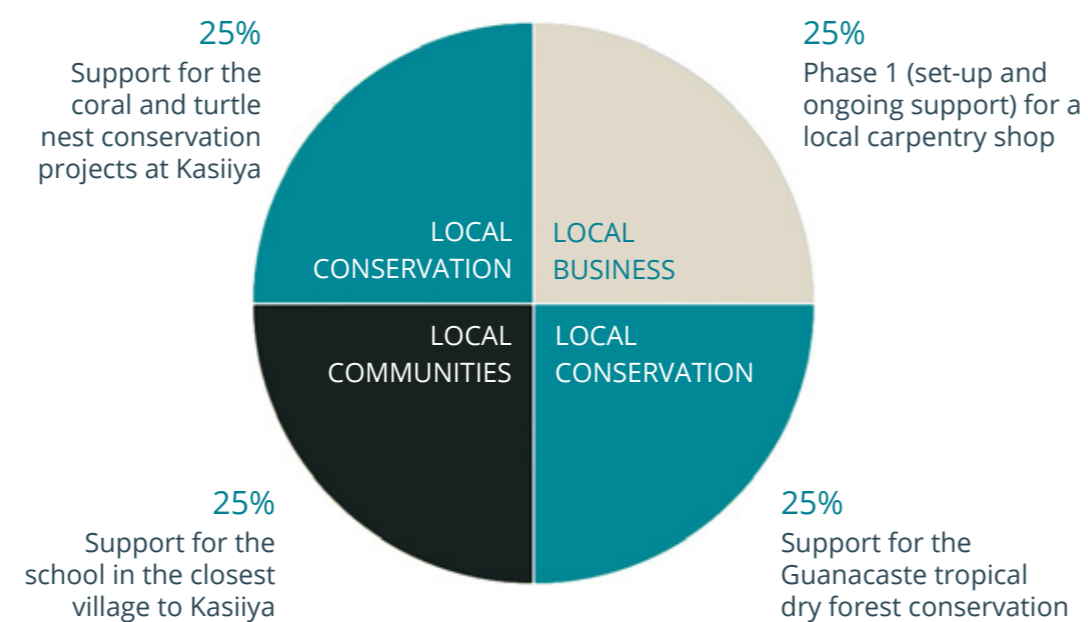

By staying at Kasiya you are helping and benefiting the people and region of Guanacaste and Costa Rica as a whole. On behalf of us and them, we thank you for your support.

How We Spent Your Bill In 2021

The Local Social Projects Of 2021

The Local Social Projects of 2022

Phase 2 - Local Carpentry Shop

- Ongoing financial and administrative support for a former Kasiya employee to grow his new carpentry business
- Partnership opportunity with Kasiya Design (our architectural and design department)
- The launch and marketing of a website for the business which, in time, will expand to offer work from other craftsmen in the region

Investment Into The Schools Of Our Staff

- In 2021, we developed new bathroom facilities at the school in Nuevo Colon, improving sanitation for young people in the village nearest Kasiya
- In 2022, we will build an additional important facility at the schools of a further two villages where our staff have children

Community Healing School

- For every treatment provided to a Kasiya guest, we will also be providing a treatment to people in the villages that surround us
- We believe people face similar health and wellbeing challenges regardless of their wealth, circumstance or culture so these treatments will be provided free-of-charge to those that need it
- The treatments offered to local people will be in three parts: diagnosis, treatment and general health advice
- We will also teach our healing and wellbeing practices to local villagers to increase employment opportunities

Ongoing Conservation Work

- In 2022 we will be continuing our support for a range of environmental conservation projects
- As part of this we will be working with the Guanacaste Dry Forest Conservation Fund further protecting the last tropical dry forest in Mezzoamerica
- We will also be implementing several turtle nest conservation initiatives on our three beaches
